Whole No. 650

Result of Inga Elections.

The fine weather on Saturday last was taken advantage of by the electorate of Inga Municipal to register their preferences for Councillors, so much so that in some of the divisions there were record votes polled. The blocked roads in the western part of the District gave those transporting voters to the polls somewhat of a check on their work; but practically all who wished to vote, succeeded in doing this.

The returns from some of the Divisions caused some little surprise—particularly so in Div. 3, where practically all pre-election calculations were upset.

It is to be noted that the three members of the last Inga Council who sought re-election (Akin, Howat, McKinlay) were re-elected.

The two members at the Council board are Henry Summerfield and John Staub.

The following is the result of the poll in each division—

DIV. 1—M McKinlay 125, John Evjen 112

DIV. 2—H H Summerfield 90, Charles Clark 59
Adam Schnell 19, Amil Krause 13

DIV. 3—George Akin 42, A H Schinke 29
C W Ibsen 20

DIV. 4—A E Hopkins 75, D H Lent 10

DIV. 5—R C Howat 100, Anton Tyrkalo 56
Gilbert Stebbings 7

DIV. 6—John Staub 83, Peter Kulak 75
John P Fuhr 60

Oneway Municipal Hospital—A F Schorley, acclamation.

In Divs. 1, 4, 6 the Councillors' terms will be for 2 years.

In Divs. 2, 3, 5 the terms will be 1 year.

Gents versus Ladies.

That long-promised and interesting sporting event, the broom ball game, took place at the local rink Thursday Fvg.—the Gold Dust Sextet, the "fancy and elegantly-dressed old maids" from the local home, giving battle to the "stately but yet ubiquitous" roisterers, representing the Trip Top Trailers. At the beginning the fun was fast and furious, the gentlemen not seeming to give any consideration to the finer feelings of those of the gentler sex on the opposite side, who were their opponents. However, owing to the frequent entreaties of the referee to the gentlemen to cut out the rough stuff, the game assumed a more peaceful aspect, and the "ladies" had leisure time to spit on their hands. The largest crowd of the season was present and seemed to enjoy itself immensely.

Following the game, skating was indulged in, where "rich and poor, prince and peasant" mingled in true democratic fashion, and "skated the evening away to the snappy tunes supplied by the local band."

The Saturday Night Dance.

The Weatherman gave a perfect evening on Saturday, for the dance of the Glee club, which was held in the Moose Hall. This was taken advantage of by a larger crowd than has heretofore patronised any affair given by this club. The larger patronage may also have been due, in some measure, to the fact that it was the last Friday dance before Ember Day, the beginning of Lent. Lou Chapin's Arcadians, who furnished the music, were given a good reception, and it is quite probable these musicians will again visit this town in the near future.

A Scheme To Raise Prices.

The tremendous decline in prices of all primary products in Canada, in common with similar declines throughout the world; the huge accumulation of unsettled war and other debts; the unparalleled restrictions imposed by nearly all nations upon imports from other nations; the break-down of the gold standard and the resultant upsetting of exchange rates between countries; the stupendous number of unemployed throughout the world, and the loss or purchasing power by practically everybody as a result of these economic disasters and disabilities, have led to making of all kinds of proposals designed to remedy, either temporary or permanently, the situation in which mankind is now floundering.

Many of the suggestions advanced are hopelessly impracticable; some utterly fantastic; and not a few of the so-called remedies would only serve to intensify the disease rather than ameliorate or cure it. Unfortunately, the distress occasioned by the present world economic situation is so great, and people are so much at a loss in seeing any way out of their difficulties, or an early solution to their problems, that thousands of them are in a state of mind where they are prepared to grasp at any straw, and the more alluring the promises made in support of any given scheme, the greater the danger of people "falling for" something which later on they would bitterly regret.

Included in the suggestions being advanced are numerous forms of "inflation" of money. Some advocate the printing by the Government of tens, even hundreds, of millions of paper money without any reserve of any value held against them. Others demand that steps be taken to bring the Canadian dollar to a parity with the British pound sterling. In scores of communities the issue of local scrip is strongly supported as a means of putting more money into circulation, speeding up business and the payment of debts, and as a means of raising prices of primary products. Some extremists advocate the repudiation of existing debt.

Despite the difficulty of their present situation, we believe the overwhelming majority of the Canadian people do not look upon repudiation of debt with favor; rather that they are willing to pay their debts and are anxious to do so, and only want to be placed in a position where they can pay. They feel they can pay their debts in the future, as they did in the past, if they could only obtain a fair price for their products above the cost of production, or steady work at a fair wage.

Because we are convinced such is the attitude of the average man, we are interested in the plan of Colin H. Burnell, past president of the United Farmers of Manitoba, as recently outlined by him in the press. Mr. Burnell proposes what he calls the Collective Produce Clearing Association, and, in brief, his plan is this:

A farmer producer brings, say a can of cream to a dairy for which he receives a cash ticket for 50 cents. Instead of cashing that ticket, he takes it to the Collective Produce Clearing Association and exchanges it for a Bond of \$1.00. He buys a C.P.C.A. 4-cent stamp which he affixes to the Bond, endorses the same on the back, and then turns it in the same as a one dollar bill on any purchase he may make. The merchant to whom he pays it then adds another 4-cent C.P.C.A. stamp, endorses the Bond in turn, and pays it to someone else, who follows the same procedure, until the Bond has fourteen 4-cent stamps, or the equivalent of 56 cents on it, when the Bank will cash it and charge it against the account of the Collective Produce Clearing Association.

What has happened is this: The farmer producer received 50 cents, instead of 50 cents, for his can of cream. His purchasing power was nearly doubled. Each of the other thirteen people who received the Bond and added a 4-cent stamp actually gave a 4 per cent. discount on the price of their goods or services. The C.P.C.A. got the original 50 cent cash ticket from the farmer and the 56 cents paid to it for stamps, or \$1.06, consequently its account at the bank was good for \$1.00 when the Bond was finally presented for payment.

Unquestionably, this is a form of inflation, but there was 50 per cent. cash back of every Bond issued. The 4 cents paid by each handler of the Bond some may argue was in the nature of a sales tax. May it not be even more fairly be called a 4 per cent. discount? And who in these days would not willingly grant a 4 per cent. discount if the volume of business could be practically doubled? As fast as these Produce Bonds were turned over fourteen times, and then cashed, one dollar of money would be placed in general circulation instead of only fifty cents had the farmer cashed his original cream check.

As Mr. Burnell points out, farm produce would flow to market as usual without interfering with prices which are set on an export basis. It would, he further adds, still allow of feeding the unemployed cheaply, but many of these would be absorbed by the greater volume of business which would result.

One seeming weakness does suggest itself, but it is a detail and does not affect the principle of the scheme. That is, whether the margin of six cents on the dollar, which is all the profit the C.P.C.A. would receive, would be sufficient to cover the costs of operation, including printing of Bonds, stamps, distribution of same to all centres, and the bonding of an agent of the C.P.C.A. in each country town which it is proposed should be done. However, if a 4-cent stamp on each turnover of a \$1.00 Bond was not sufficient for the purpose, a 5-cent stamp, or a 5 per cent. discount instead of four, would no doubt prove more than sufficient.

Mr. Burnell's plan is certainly deserving of further consideration and study by farmers, merchants, and, in fact, everybody because one and all are anxious to find some relief, even of a temporary character, from the impasse into which all have been brought and from which all are seeking a way of escape.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Chernoff, Shoresacres, B.C., writes:—

"I had been so troubled with shortness of breath I could not lie down to sleep. I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak. I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Colloidal Fuel Is New

Canadian Coal Can Be Used For It Says Ottawa Engineer.

Of great interest to Canadian coal producers is the announcement of William Burnip, prominent Ottawa engineer, that Canadian coal may be used as the basis of a newly invented coal—colloidal fuel. A friend of Mr. Burnip, Stephen L. Wyndham, is the inventor, and Mr. Burnip, who was recently in Cardiff, Wales, has seen the invention demonstrated.

It has been a dream for years to invent a fuel by mixing coal with oil and getting a fluid mixture in which the coal would not settle down to the bottom. Mr. Burnip maintains the invention has succeeded in producing samples of colloidal fuel—a combination of coal and oil—in stable mixtures varying from 60 per cent. coal and 40 per cent. oil to 80 per cent. coal and 20 per cent. oil. In his announcement Mr. Burnip says the intriguing feature to Canada is that the fuel will be cheaper than oil and can be produced from Canadian coal. Even the oil used in the mixture, he says, can be replaced by coal tar and oils derived from the distillation of coal. He predicts its use in power plants requiring intense heat with flexibility of oil fuel.

"The value to the Canadian coal industry should be very marked," he says in stating the fuel could be used for oil-burning furnaces in the home.

In reporting the result of the various tests he witnessed recently before the South Wales Institute of Engineers, of which he is a member, he adds: "No one was prepared to witness the intense white glare given out by the burning colloidal fuel, against which the flame from the best quality fuel oil appeared yellow and smoky, both burnt under exactly the same conditions."

Precious experiments have failed because the coal has sunk to the bottom of the mixture. Wyndham has added what is called a "stabilizer." During the process of mixing, each bit of coal, ground to a particle, becomes coated with a film of stabilizer, which adheres to it even at high temperature. The result is each coal particle floats permanently in the mixture and the perfect looks like vaseline when cold and flows like oil when about 80 degrees Fahrenheit. Its density results in a tank built to hold 500 tons of fuel oil accommodating 650 tons of colloidal fuel.

Mr. Burnip says the interest of the oil and coal world was thoroughly aroused recently when the Canadian steamship line used some colloidal fuel in one of their steamships on a voyage with distinct success. Something attempted in the way of a liquid fuel, using present coal field products, has caused interest for years.

Mongolian-Japanese Dictionary Completed

Is First Of Its Kind and Contains 2,000 Pages

After 16 years of work, Major Kenji Shimonaga of the Japanese War Office has completed a Mongolian-Japanese dictionary, the first of its kind, which will be published shortly by the army. It is a book of 2,000 pages.

The army long has given close attention to the study of foreign languages and has in its language school experts on nearly all tongues. Major Shimonaga has specialized Mongolian, Chinese dialects, Manchu and Tibetan. He had to design special type to reproduce the intricate Mongol characters appearing in his dictionary.

"Fruit" Hardly Right

The St. Thomas Times-Journal describes Canadian-made cod liver oil as "one of the fruits of the Imperial Conference." This Colyum can only say that anyone who thinks cod liver oil a fruit should have to take it as a punishment says the Toronto Star.

The output of gold from the placer deposits of the Yukon territory in 1932 had a value of \$900,000. In 1900, the greatest year of the Klondike gold production, the output was valued at over \$22,000,000.

If going hatless doesn't affect the mind, as experts say, it just calls attention to it.

The Instinct Of Birds

Is Just Acute Sense Of Sight and Hearing

The mystery of how migrating birds find their way unerringly to their destination will probably be dispelled by further field observations, it is predicted.

Repeated observations of the behaviour of migrating birds have convinced Prof. Patten of Sheffield University, that they are not guided by any "special sense" but, that they find their way by watching their surroundings and by profiting from experience.

"Birds possess an 'eye-brain,'" he says. "Their sense of vision is extraordinarily acute and by no means indiscriminating. It seems unreasonable to brush aside the idea that migrants may obtain guidance by taking stock of landmarks. Furthermore, the sense of hearing can play a part. The wash of the waves is a reminder to hug the coast—the guide-line of primary importance. The courses of great rivers are followed by overland migrants."

"Birds band together for the trip, thus giving the untravelled young an opportunity to be guided over the route by adults who have already been over the ground."

"In thick weather migrating birds often go astray, and, arriving at unaccustomed haunts are classified as rare and accidental migrants. When the weather deepens the voyagers become sorely handicapped, while a dense and prolonged fog will put the brakes effectually on migration."

Fewer Sea Fish Caught

Fishermen Curtail Efforts Last Year Because Market Was Poor

Excellent reasons for eating Canadian fish are that fish are nourishing and health-making foods, and that Canadian fish are unexcelled in quality. We call attention to these facts in the hope that people will eat more fish and, in that way, assist the fishermen to make a better living.

The Fisheries News Bulletin, issued by the Department of Fisheries, Ottawa, states that exclusive of the catches from one or two minor fisheries the landings from Canada's sea fishing operations in 1932, as shown by unreviewed statistics, totalled approximately 7,120,000 hundredweights. This total was smaller than the sea fisheries total for 1931 because with economic unsettlement continuing throughout the world during 1932 the fishermen curtailed their fishing effort. The reduction in landings reflects market disturbance. Plenty more fish could have been taken from the Dominion's sea fisheries resources if the market situation had warranted greater catching efforts.—Toronto Mail and Empire.

Saskatchewan Power

Commission Shows a Deficit Of \$50,970 For Year 1932

Despite an operating profit of \$132,217 for the year 1932, the balance sheet of the Saskatchewan power commission showed a deficit of \$50,970, when provision was made for depreciation charges, according to the annual report tabled in the legislature by Hon. J. R. Merkle, Minister in charge.

The report indicated that no new undertakings nor extensions had been embarked upon by the commission in 1932, the second year in which the activities of the commission have been confined almost solely to operation of existing systems.

By this time, father has tired of playing with the electric train Junior got for Christmas.

Friends..

Roll your owners... Countrymen!

Lend us your ears! Ogden's Fine Cut cigarette tobacco is just right to "roll your own." It measures up in every way to a man's notion of what a cigarette tobacco ought to be!

Easier to roll for one thing: And a far better cigarette when the rolling's done and you light it up. Yes, sir. You'll like Ogden's Fine Cut. It gives you the combination you're looking for in cigarette tobacco... fragrance... sweetness... absolute satisfaction. That's worth a cheer any day!

P.S.—Free "Chantecler" cigarette papers with every package.

OGDEN'S FINE CUT

Your pipe knows Ogden's Cut Plus

Ban Is Lifted

Freight May Now Be Shipped To Churchill Without Permit

Further indications of the opening of Churchill to the public this year is seen in the recent ruling on the Hudson Bay railway to the effect that freight may now be shipped to Churchill without a permit.

A similar ruling applies to passenger traffic. Since the steel reached Churchill in March, 1929, it has been necessary to have a permit to enter the port or ship goods to the sea. This ruling was the subject of much criticism, among traders and others who had business in the far north. Last year the road was open to the public as far as Glimm Mile 327. Permits were required from that point to sea.

The new ruling lifting the permit ban came without publicity or advertisement. Railroaders say that it was the desire not to encourage a trek in the direction of the new port while the townsite lacked facilities for handling transient traffic.

A committee of five often consists of the man who does the work, three others to pat him on the back, and one to bring in a minority report.

Unique Plant Is Set Up In Ontario Town For Extraction Of Radium From Pitchblende

A prospector high above Great Bear Lake looked down. Strange markings on the shore of the lake lured him. The next year he returned and found pitchblende, mineral from which radium is derived. From that casual glance came Canada's first radium refinery at Port Hope, Ont.

It's a queer place, this refinery. A long concrete building surrounded by a high wire fence. A strange place. The front door is locked. The fence seems insurmountable. A watchman at the gate scrutinizes people closely. A show of credentials and finally, admittance.

A long white table covered with jars of minerals. A big safe. Bunsen burners, one burning steadily. A small retort filled with mineral, "steeping" over the burner.

In the background the factory. Huge tanks on one side. On the other, a mass of pipes, stairs, earthenware vessels and other things left the tanks for uranium extraction. On the right, the machinery for the production of the world's most valuable "salt." For it looks like salt, this lead-packed radium which is so greatly needed for cancer treatment. But there is a vast difference. A needle no larger than that used in a phonograph is worth \$550 when filled with radium.

But with M. L. Pochon, scientist who learned his trade in Paris, let us climb to the roof, the "top of the world." As Mr. Pochon says: Wooden stairways wind around the machinery. At the top is a narrow platform. There are bags of ore, pitchblende. There are carboys of chemicals. Into two electrically-stirred vats the ore and chemicals are poured. The ore is a black powder, already ground.

The mixture is heated and stirred. Strange things happen. It travels by gravity and vacuum pump into other vats, through rubber-lined pipes. Finally the uranium and residue is drawn off. The white precipitate containing the radium is removed to the laboratory. The residue starts up to the top again and moves through a succession of wooden tanks until it emerges as a yellow powder, used for ceramics and pigments.

But that is of minor importance. Let us follow the radium to the "lab" for the final processing. There are dozens of quart bowls in the "lab." The radium, in liquid solution, moves from one to the other. The liquid crystallizes. It travels on and on, the bulk becoming less and less. From the big vat in which it started it moves gradually into smaller glasses and bowls. Eventually, it reached a small container no larger than Milady's thimble. It is pure radium now, nearly ready to take its place in the fight against the dread scourge of cancer.

In many cases the radium must now be placed in surgical needles. This is a delicate and dangerous operation. For radium's emanation and radiation are dangerous. Hence the chemist, as he fills the needles, must be protected. He sits before a glass case. He places his hands in rubber gloves, through holes in the end of the case. Across the section where his chest rests runs a heavy lead pad. The rays are absorbed by lead, while the sealed glass case retains the bulk of emanation.

It takes hours to fill each tiny needle. Then the radium is weighed on scales so delicate the markings of a lead pencil on a sheet of paper would upset their balance. They will weigh 1-100th of a milligram, and there are 1,000 milligrams in a gram. It is delicate work.

In the laboratory too is a large vat of water. After each operation the scientists wash their hands in this vat. When the vat becomes filled it too is submitted to the final processing given the radium itself. Every possible atom of the radium is extracted, for it is of vast value.

And, as was often said of pigs at the Chicago stock-yards, everything is used by the "hog."

W. N. U. 1933

Program For Recovery

Helps To Prosperity As Seen By Secretary Of U.S. Treasury

Ogden L. Mills, United States secretary of the treasury, urges as a program for recovery:

"First, a balanced budget; second, an easy money policy consistently pursued by the principal central bank; third, a definite attack on the debt problem, not by wholesale machinery but by setting up adequate machinery to deal with different categories of debt; fourth, a settlement of the foreign debt question; fifth, a stabilization of world exchanges by a return to the gold standard; sixth, the lifting of arbitrary trade barriers."

This is partially a program for the United States and partially a program for the world. For Canada, there can be drawn up a program to aid recovery that would be this country's most useful contribution to its own and the world's prosperity.

It is as follows:
1. Balance the federal budget.
2. Balance the provincial budgets.
3. Reduce local taxation.
All else is secondary and most of the other aids to recovery would follow naturally.—Financial Post.

TINY GIRLS LOVE TO WEAR FREE AND EASY CLOTHES FOR PLAYTIME

And won't she love this cunning dress? The fulness hangs from the brief French yoke. The skirt may join the yoke with pin tucks or with soft gathering as in the back view. It is very dainty—and yet very practical in yellow batiste with tiny white dots and plain white trim.

Blue ground dimity with wee white posies and white contrast is another delicious scheme. Pique, linen, gingham and seersucker are other sturdy smart suggestions. Style No. 465 is designed for sizes 2, 4 and 6 years. Size 4 requires 1½ yards 35-inch, with ½ yard 35-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Issues Warning

Says United States Is Inviting War By Its Weakness

A stern warning that the United States is "inviting war" by its "weakness" in naval strength was made by Rear-Admiral William A. Moffett.

The outspoken chief of naval aeronautics said Americans "are too busy boasting that we are the greatest nation on earth."

"It never seems to occur to us, in our conceit," he said, "that another nation may declare war against us." In that event, he added, the United States would find itself in a position of holding "a pair of deuces against a full house."

Moffett addressed the Naval Academy Graduates' Association of New York at its annual banquet. His listeners heard a frank discussion of events in the Far East and prospects for continued world peace. The admiral was bitter in his criticism of this nation for being a party to the Washington treaty of 1922. "Uncle Sam lost everything but his shirt tail when he signed the Washington treaty," he said.

Moffett expressed veiled warnings of what Japan might accomplish by building a navy for the puppet state of Manchoukuo. "Such a navy would not be subject to treaty limitations, including the treaty ratios," he said.

Holland's Plans Going Ahead

Reclamation Of Land Involves Total Cost Of Four Hundred Millions

While public works in many parts of the world are at a standstill owing to the financial stringency it is interesting to note that work on Holland's great 20-mile barring dam across the Zuider Zee and the reclamation plans connected therewith go merrily ahead. In fact, work on the dam proper has been completed and it is now possible to drive across the sea in a motor car or other conveyance. The dam is a unique connection between the two Dutch provinces, North Holland and Friesland. It is part of the Zuider Zee reclamation plan, which involves a total cost of \$400,000,000, of which \$50,000 acres of new territory are to be won. The first of four polders, covering an area of 50,000 acres, is already in cultivation. The dam itself, huge batteries of locks and bridges included, has called for an expense of \$600,000,000, is 300 feet wide and carries a railway track, a highway for fast traffic, a cyclists' path and a road for pedestrians.—St. Thomas Times-Journal.

Fastest Train In The World, Operated In Germany, Has The Speed Of An Aeroplane

Speedy as an airplane, cheaper than a locomotive, cheaper too, perhaps, than automobile transportation, the new German Diesel-motored express train has stood all its test trips with a success that has attracted the attention of railroad men from all over the world, and now the "Flying Hamburger" has been entered as the "fastest train on earth" for regular service on the Hamburg-Berlin route beginning in March.

Personal experience of the "lightning train," as the Germans call it, is sufficient to bring conviction that this may after all be the railroads' answer to steadily growing competition of automobiles. It is sufficient, too, to justify the inclusion of the "Flying Hamburger" in that remarkable series of post-war technical achievements by German engineers—the Zeppelin, the Europa, the Bremen and the "Do-X."

The long, low, violet, and cream colored, stream-lined car, pulled out of the Lehrter station in Berlin at 10:30 o'clock in the morning. The 100 passengers, luxuriously accommodated, are scarcely aware that even before the train has cleared the mass of local switches the speed has reached the average top of a through express in the open country. At sixty miles an hour the vibration is hardly perceptible.

Beyond the suburbs the speed increases to seventy, eighty, and then on a straightaway it jumps to ninety miles an hour. Now there are very few persons in the world who have travelled ninety miles an hour on a railroad train, but any traveller who has ridden the fast transcontinental train of America knows how it feels to be going at seventy or seventy-five. We were sure the "Flying Hamburger" was not making more than seventy-five when our hosts asked us to visit the motorman's compartment.

There, up in front, the speedometer showed ninety, then ninety-five, then 100 and finally hovered around the maximum, 104 miles an hour, the fastest speed ever reached by a motor-driven, propellerless vehicle on rails. Controlling this speed, controlling every adjustment of the combined Diesel-engine, dynamo-motor unit, the motorman had but one movement to make. The entire control is centred in a single handle, simple as the control of a street car.

Our vibration was even less than in an ordinary Pullman at half the speed. One good reason is the under-slung construction, and this is unique in the "Flying Hamburger," for here the inventor, Dr. Frederick Fuchs, director of the Federal Railways, solved for the first time, the problem of compressing the whole motive power, consisting of two 410-horse-power Diesel engines and two electric generators, in two compact units, slung just above the rails, so that the centre of gravity is very near the roadbed and the train hugs the ground so closely that it can take curves at double the speed of an ordinary train.

But up in front the sense of velocity becomes impressive. The rails stretched out in endless bands of silver and they poured down the mass of our hooded monster at a rate that made one gasp. An express train, laboring along on a parallel track in our direction, seemed standing still as we sped past.

We were going at a speed of forty-five meters a second. The German rails are often meters long. Some idea of what 104 miles an hour is may be gained from the fact we were hitting three railclicks a second. This was so fast it blurred the clicks into a steady hum.

Back in the passengers' compartment nobody noticed the speed, and the waiters from the buffet-bar served soup and coffee with no more difficulty than on the diner of the North Express. The train left Hamburg at 12:50, and a vast crowd peered over the embankment railings to watch the goggle-eyed snout of the "lightning train" nose to rest just two hours and twenty minutes after it had left Berlin. We had cut nearly an hour off the ordinary train time from Berlin to Hamburg and had covered the 187 miles at an average of eighty miles an hour.

But the train had just warmed up. Without stopping, and without the necessity of refueling for anything, the "Flying Hamburger" can run 1,300 miles, or from Berlin to Paris and back non-stop. It could be made to develop an average speed much higher than eighty miles an hour, but not on the existing crowded tracks. An extra track from Berlin to Hamburg would make possible an average speed of 100 miles an hour, so that the trip between these two cities could be made in under two hours.

But the profitability of the "Flying Hamburger" depends, of course, on its cost. The first unit cost \$80,000 to build, according to Dr. Fuchs. This is more than it would cost in anything like mass production. But the operating cost, according to Dr. Fuchs, is one-fourth the cost of running a steam locomotive train with the same carrying capacity.

At the moment its speed is also greater, from station to station, than the normal airplane speed. Planes now in use in Germany would require an hour and a half from field to field, but another hour has to be added for transportation to and from the fields, making a total of two hours and thirty minutes against the "Flying Hamburger's" two hours and twenty minutes.

Hard Times

Comparing the Present Era With the Difficult Times Of 1894

Frequent comparison is heard of the present era with the "hard times" of 1894, but so far we have heard of no one going back to dishing "tin and misery" as a substitute for coffee. "Sin and misery" was made by burning bread until black, and then steeping it as a tea, explains A. E. Hatch. It received its name through a remark of a neighbor of the Hatch family at that time that "It is a sin to burn the bread and misery to drink it."—Wakenda, S.D., Mon. m.

+ Do You Know? +

Photograph, Canadian National Railway

WHAT when the sap begins to run in the Maple trees in southern Quebec it is accepted as a sign that Spring has come and so the "retailers of winter" are thrown off and crowds of people, young and old, gather in the sugar maple groves to make merry? It is the first picnic of the year in Canada. The old time fiddler is on hand and couples dance as the dead leaves while others drink the sap or dip their sugar paddles in the syrup that is being boiled down into sugar. The photograph shows a section of a gay party in a Quebec Maple Sugar grove.

OVER 25 MILLION JARS USED YEARLY

WORLD HAPPENINGS BRIEFLY TOLD

Last calendar year 50,000 pounds of New Zealand butter was entered into Canada, while 400,000 pounds came into this country in bond. Eighty-one persons were killed, 120 injured and 10 were missing after an explosion in two gasoline vulcanizers in a Chinese rubber factory in east Shanghai.

Formed in Ottawa during the Imperial Economic Conference, the Empire Fruit Producers' Federation will hold its first annual meeting in London, England, in the latter part of August or early in September.

Compulsory voting is provided for in a bill, which W. E. N. Sinclair, Ontario Liberal leader, gave notice in the Ontario legislature. Mr. Sinclair would have everybody who has a vote exercise his franchise or lose it.

There was one automobile to every 66 people in the world in 1931, as compared with one car to every 54 in 1930, according to figures compiled by the U.S. Commerce Department's automotive division.

Sir Charles Kingsford-Smith, it is said, is planning to try for a new record for a flight from England to Australia in about eight days. The record, held by C. W. A. Scott, is eight days, 20 hours, 49 minutes.

Two manufacturing firms in London, Ontario, are producing about 30,000 jigsaw puzzles daily. Some 450 people, mostly girls, have been given employment and the payroll is more than \$7,500 weekly.

A chain of meteorological stations, linked with posts in the Arctic, the tropics and Antarctica, in daily radio communication with a central bureau, is the ambition of Sir Hubert Wilkins, adventurer and scientist, he told interviewers at Winnipeg.

Abolition of speed-limit regulations to be replaced by provision placing onus on drivers to run their cars at a speed warranted by circumstances not to endanger the life or property was approved by the Ontario Motor League meeting in Toronto.

Ancient Tortoise Dead

Immature of London Zoo Was 200 Years Old

London's oldest resident died at the ripe age of 200. He was Sopa, a tortoise of the London zoo, who first saw the light of day in the Galapagos Islands about the time when George Washington was in the cradle.

Sopa was so big he carried children for rides on his back and so he creaked when he walked.

The London zoo still has an American alligator 150 years old, and two tortoises well over the century mark, but Sopa was the most ancient of them all.

One Of Queerest Memorials

Felt Hat Hangs By Roadside In New South Wales

By the side of the road which winds up from Comarr, in the back blocks of New South Wales, hangs the strangest of memorials. It is an old felt hat.

Time-worn and battered, and covered with moss, it has been there for thirty years. The farmers going down the road in their carts (or newer cars) point it out, and to a stranger will say that it is all that is left of poor Frank Burke.

Burke was driving a cart along the cutting by the precipitous bank when some unknown cause frightened the horse. It bolted; and horse and cart driver went over the side. The cart was smashed to splinters far below. The horse, strangely enough, was found half-way down the bank unhurt. But the driver was killed.

They found his body after a search and some man in the party took the hat which lay beside him and hung it on the branch of a tree. There it remains, and nobody touches it or ever thinks of moving it.

By Ruth Rogers

517
A RAVISHING BLACK CREPE DRESS FOR DINNER, SUN-DAY NIGHTS AND EVENING WEAR

Whether you carry this model out in black crinkly crepe silk, white crinkly crepe or printed crepe silk, the effect is adorable.

Note how charmingly the deep armholes are finished with applied bands, which if you like, can be of sequins. The belt may also be of sequins.

The lower bodice is fitted with pointed front seam to cut breadth. The slim skirt has a comfortable hem fullness.

It's a model too that is stunning for cruise wear and later for summer evenings carried out in white chiffon with silver coin black dots.

Style No. 517 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 3 1/2 yards 39-inch with 1/2 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Chinese Woman Barrister

Now Practising Law In Hong Kong With Unusual Success

Young China's rapid march toward modernism which has seen, among many other reforms, the elevation of the status of women in business and the professions, recently resulted in the advent at Hong Kong of China's first woman barrister. The first of her sex to do wig and gown in China is Mrs. Lo Soon Kim Teo, whose admission to practice in Hong Kong was sanctioned by Chief Justice Sir Joseph Kemp. She belongs to a well-known Nanking family and came to Hong Kong from Singapore where she practiced law.

Mrs. Soon, Hong Kong residents report, came into prominence when she successfully defended a Chinese at the Singapore Assizes who was charged with murder. Her conduct of the case was masterly and dramatic to a high degree. Educated in England, she studied law at the Inner Temple for three years before her admission to the Bar in London, in June, 1927.

Tourist Traffic Lower

Number Of Canadian Cars Travelling Abroad Also Less Last Year

The tourist traffic showed a falling off for 1932 compared to 1931, according to returns by the Department of National Revenue. Automobiles entering last year for less than 24 hours totalled 3,067,367 and the year before 3,438,492. For periods not exceeding 60 days, 1,032,681 entered last year and 1,469,763 the year before. For longer periods, however, there was an increase, those staying up to six months totalled 5,636 last year and only 744 the year before.

The number of Canadian automobiles touring abroad was also reduced last year, totalling 376,534 and the year before 536,855.

The figures for western provinces of last year's entry of tourist automobiles for 24 hours, 60 days and over 60 days, respectively, follow: Manitoba, 32,999, 11,593, 12; Saskatchewan, 16,998, 4,632, 6; Alberta, 17,720, 3,854, 1; British Columbia, 49,466, 94,366, 48.

First Man Wounded In War

Victim Of Frontier Clash Has Just Died In France

M. Laibe, the first Frenchman to be wounded in the World War, has died near Belfort, France. M. Laibe, who was a Customs officer in 1914, was on duty at Sucre on the Sunday before the war had been declared and the first frontier clash occurred. A German Uhlans detachment crossed to French territory, requisitioned horses, carts, and cattle, and took several inhabitants of Sucre with them as hostages. M. Laibe was with a frontier patrol, comprised of Customs officers which came up at that moment. The Uhlans fired on the small party, wounding M. Laibe, and then fled, abandoning their booty.

SUNDAY SCHOOL LESSON

MARCH 5

JESUS GIVING LIFE AND HEALTH

Golden Text: "Jehovah hath done great things for us, whereof we are glad."—Psalm 126:3.
Lesson: Mark 5:21-43.
Devotional Reading: Psalm 116:1-9.

Explanations and Comments

The Triumph Of Love Over Pride. Verses 22, 23.—When the people of Gergesa brought Jesus to leave their borders (our last lesson), He returned to the western side of the lake and was there welcomed by "a great multitude." Then there came a ruler of the synagogue, a man who had oversight of the arrangements for worship, Jairus by name, and fell at the feet of Jesus in an agony of supplication. His little daughter was dying, and he begged Jesus to return with him and lay his hands upon her so that she might live. There was no act of homage the proud Pharisee would not render if only his daughter's life might be spared. "Pride and love both tugged at the heart of Jairus that he might win his position and love for his child. Pride whispered, 'Don't demean yourself. Think what your friends will say.' Love whispered, 'Your little daughter is at the point of death.' It was a battle between these two mighty forces in the human soul—pride and love. Love triumphed, and throwing his pride to the winds, this man, this personage in Capernaum, made his way into the midst of the crowd of 'common people,' of publicans and sinners who were about Jesus. And before the eyes of them all flung himself at the feet of Christ, sobbing out his prayer. In the Greek you can almost hear his sobs and his broken phrases. 'My little daughter is in extremity—that Thou come and lay Thy hands on her—Thou shalt save me, and live.'"
J. D. Jones.

The Triumph Of Faith Over Fear. Verses 24-34.—Jesus assented to the ruler's plea and was on His way with him to his home, followed by a great crowd of people, when an interruption came. There was a woman in the throng who had been afflicted for twelve years with a distressful malady. She had spent all her money on physicians, under whose treatment she had suffered much, but had not been helped. In the Mishna it is affirmed that the best physicians is worthy of Gehenna; an account of the "materia medica" in use at this time explains the observation. The woman had lost health, money, and hope, and her desperation drove her to Jesus. She pushed herself forward, and despite the fact that the ceremonial law held her touch to be a defilement, she touched the hem of Jesus' robe, or one of the tassels at the corners of the square garment. "If I touch but his garments, I shall be made whole."
J. D. Jones.

Greece Barters With Canada

System Sanctioned By Recognized Government Now In Effect

First official system of barter receiving sanction in modern times from a recognized government came into effect February 16, when the Republic of Greece permitted importation of a selected list of commodities only in exchange for Hellenic products. It was learned from officials of the Montreal Board of Trade.

Products which must henceforth be exported to Greece on the barter plan include fresh fish, fresh fruit, shoes and other leather products, furs, furniture, iron products including iron pipes and tubes, perfumes, toys and pencils.

The barter plan is of great interest to industrialists the world over, particularly in the United Kingdom and France, but what effect the Hellenic experiment will have on Canadian export business is not known here.

For Cadet Training

House Of Commons Passes Vote For \$300,000 For This Purpose

The House of Commons passed a vote of \$300,000 for cadet training, defeating an amendment by Miss Agnes MacPhail (Prog., South-East Grey), to decrease it by \$30,000.

The question of cadet training in Canadian schools came up for discussion again when the national defence estimates were under consideration. When this item, amounting to \$300,000, was being considered it met with considerable opposition.

March Winds Hurt The Complexion

Keep the skin perfectly healthy by washing with Baby's Own Soap using tepid or warm water and drying perfectly, and the keenest winds will do no lasting damage. This is the prevention which will save much disfigurement, and the necessity of hiding blemishes under powder and cosmetics. The soothing and fragrant lather of Baby's Own Soap is wonderfully agreeable. Individual cartons—10c everywhere.

"Its best for you and Baby too"

On Verge Of Starvation

Eskimos At Chesterfield Inlet Reported To Be Short Of Food

A poor run of white fox and deer in the Chesterfield Inlet country, 450 miles north of Churchill, have left the Eskimos on the verge of starvation this winter, according to the Rev. Father Emmanuel Duplain, Roman Catholic missionary at Churchill, who has arrived from the north.

The missionary says that the natives will be able to get through the winter, but supplies are low. Last summer Father Duplain took supplies to the hospital-mission at Chesterfield with the motorship "Theresa." It was his intention to make several trips, but engine trouble and bad weather prevented him from making scheduled trips and he was unable to take more than a few tons of supplies to the post.

Before making the final dash south to Churchill, Father Duplain and a crew, hunted walrus near Walrus Island, south of the inlet. They got 18 walrus, averaging 1,000 to 1,500 pounds. These were taken back to the inlet and given to the natives.

Two Eskimo dog drivers arrived at Churchill mission in January with mail from the hospital at Chesterfield. They brought word that the Polar year party of Canadian scientists who are studying aurora and earth currents, are all well and studying natural phenomena according to schedule.

Administering Indian Reserves

One Hundred and Sixteen Agencies Are Scattered Throughout the Dominion

The local administration on the reserves scattered throughout the Dominion is conducted through the Department of Indian Affairs agencies, of which there were 116 in 1931-32. The number of bands included in an agency varies from one to more than thirty. The staff of an agency usually includes various officers in addition to the agent such as the medical officer, clerk, farm instructor, field matron, nurse, constable, stockman, and so on, according to the needs of the reserves. The agency in question. At many of the smaller agencies in the older provinces where the Indians are more advanced, the work is comparatively light, requiring only the services of an agent. The work of the agencies is supervised by the Department's inspectors.

Small Wonder

A press despatch from Galt, Ontario, states that seventy guests at a Burns banquet were made ill by lemonade served there. Lemonade at a Burns banquet! Shades of the immortal poet! No wonder the guests were ill!

The Doctor's Trade Mark

Doctors in Berlin may now carry an extra lamp on their cars. This shows a red cross on a green background, and is for use only on occasions of urgency, when the policemen will get them through traffic as quickly as possible.

CAMPBELL SETS A NEW WORLD SPEED MARK

Daytona Beach, Fla.—Great Britain's dominance in the realm of speed was skyrocketed to new heights by Sir Malcolm Campbell in a daring race against time along the ocean speedway here.

In two blistering runs over the hard-packed beach, the 48-year-old driver stroked to a new world automobile speed mark of 272.108 miles an hour over a measured mile route to climax a quarter of a century of record-smashing achievements.

He also established a new record of 272.463 miles an hour over one kilometre on the same beach and 257.299 over a five-kilometre course.

Driving a long, streamlined Bluebird car, equipped with a 2,500-horsepower aeroplane motor, Sir Malcolm clipped 94 of a second off his own previous record of 253.988 for the mile and increased the mark by 18.110 miles an hour.

On his first run the British driver attained the astounding speed of 273.556 miles an hour as he roared over the beach, paralleled on one side by a pounding surf and on the other by high, irregular sand dunes from which thousands of spectators looked on. His time for the mile on that run was 13.16 seconds. His second trial, made in the opposite direction, was clocked at 13.30 seconds for a speed of 270.676 miles an hour.

Returning to the grandstand after his trials to be greeted by cheering spectators, Sir Malcolm characterized his race as "the worst ride I ever had in my life." He was forced to steer the bouncing car over the course with only one hand, as he had injured the other a week ago in making repairs to the machine.

Sir Malcolm covered the kilometre, which is approximately five-eighths of a mile, in 8.18 seconds for a speed of 273.463 miles an hour on his first run. On his second run that distance he was clocked at 8.24 seconds for a speed of 271.472 miles an hour. The kilometre was marked off inside the measured official mile.

In setting up a new record for five kilometres, Sir Malcolm attained a two-way average speed of 257.295. His previous record for that distance, established here last year, was 247.941.

Following his epochal race, Sir Malcolm indicated he would not make another attempt to boost his newly-established record.

He said he could not race again so long as his sprained arm was paining him, and he expressed a desire to go to New York as soon as possible to sail for England.

Sir Malcolm said he was satisfied with the performance of his car under such adverse conditions, but he was confident that, given a better beach and good visibility, he could place the record much higher.

Japs Press Forward

Railway Line In Manchuria Has Been Seized

Chinchow, Manchuria.—The entire Chinchow-Pelipao railway was in the hands of the Japanese army, and in the Pelipao terminus they were provided, with an excellent railroad jumping-off place for their drive to clear the Chinese forces out of the province of Jehol.

When General Yoshimichi Suzuki's troops marched into Pelipao they found the city deserted. The railroad tunnel from Nanling, a few miles to the east, had been damaged by the Chinese, who also attempted to blow up a bridge to check the Japanese advance.

From Pelipao the Japanese will move across the province to the city of Jehol. Thus far, according to army sources, the operations have been merely preliminary to the major offensive.

To Carry On

New York.—President-Elect Roosevelt has invited Norman H. Davis to continue as head of the United States armament delegation, and gave him orders to carry on the present American policy in this respect.

W. N. U. 1983

British Trade Improves

Not Only Recovering, But Shaping a New Britain

London, Eng.—The United Kingdom imported more from the dominions during 1932 than ever before and its exports to empire countries also increased in the same period. Commenting on these trade statistics, published here, Leslie Hore-Belisha, financial secretary to the treasury, declared in a London speech, "we are not only recovering but are shaping Britain anew."

A general improvement in British trade statistics which show the debt balance fell last year from £104,003,000 in 1931 to £59,000,000 in 1932 and that the adverse trade balance for the same period was reduced from £408,000,000 to £289,000,000, is noted in the statistics.

After rectifying figures which testified to increased trade in several departments, Mr. Hore-Belisha proclaimed the trend "one of the most marvellous rehabilitations ever recorded in history."

"If we had the same invisible receipts as we had in 1931 we should actually be £15,000,000 on the right side," he continued. "We imported less food and more raw material and produced more manufactured goods in 1932 than in 1931."

Enfranchising Indians

Opposition Is Encountered At Ottawa Over Proposal

Ottawa, Ont.—Hon. T. G. Murphy, head of the Indian Department, raised a storm of protest in the House of Commons when he proposed changes in the manner of enfranchising Indians. Opposition members claimed he was seeking power to compel Indians to become naturalized Canadians.

An amendment to the Indian Act was proposed empowering the superintendent-general of Indian Affairs to appoint a board which, after inquiry might report on the fitness of any Indian to be enfranchised.

The clause to be repealed provided that action must be prefaced by the application of an Indian, or a band of Indians following a majority vote of the band.

Mr. Murphy said there are in Canada many Indians who should accept the full responsibilities of citizenship. He gave an instance of an Indian who was engaged in manufacturing, but who sought to evade the Sales Tax on the ground he was a ward of the government. The bill proposed to give the superintendent-general power to deal with such cases.

Barter Plans

Now Prepared To Conduct Trade Without Financial Guarantee

Calgary, Alberta.—Bona fide satisfactory to the Federal Government have been established and the syndicate sponsoring the bartering of Canadian livestock for oil and coal from Soviet Russia is now prepared to conduct the trade without financial guarantee from the Canadian government.

This was the declaration of G. G. Serkau, head of the syndicate, in a telegram to the annual convention of the Western Livestock Union here. The convention went on record in support of the barter plan and urged immediate completion of details. Mr. Serkau's telegram said the only assurance now required was that variations in customs regulations detrimental to Soviet products, would not be placed against them during the life of the agreement. The convention by resolution asked that this assurance be given.

Jap Nationals In Danger

Tokyo, Japan.—A government spokesman said there was "real danger" Japan would be compelled to take steps to protect Japanese nationals in Peking and Tientsin endangered by the impending military campaign to conquer the province of Jehol, to the north.

Ask Aid From Dominions

London, Eng.—Thorough belief in the future of the British Empire and the wish that the Dominions and colonies would help the United Kingdom were expressed at the luncheon of the Canadian Chamber of Commerce by Lord Derby.

FINANCE MINISTER ILL

Hon. E. N. Rhodes, Canadian Minister of Finance, who took up his duties at Ottawa ten days ago against the advice of his medical advisers, has been again forced to relinquish his duties owing to ill-health. This means that the Prime Minister may have to prepare the 1933-34 budget.

Appeal Of Colombia

League Of Nations Tries To Find Means Of Settlement For Amazon Conflict

Geneva, Switzerland.—The council of the League of Nations heard the appeal of Colombia for intervention by the League against Peru's "aggression," undertook to find a just pacific settlement for the conflict on the upper Amazon.

A committee of three was instructed to study the problem and through consultation with Colombia and Peruvian representatives seek a solution upon a basis of conciliation as provided by the League covenant.

Assessment Is Cut

Vancouver Cuts \$50,000 from Taxation On C.N. Property

Vancouver, B.C.—Civic assessment on the uncompleted Canadian National hotel was dropped \$50,000 to \$2,000,000 by the city council sitting as a court of revision.

Valuation on the Canadian National Steamships dock at the foot of Main Street was reduced at the same time from \$800,000 to \$750,000.

In all, the city of Vancouver relinquished taxation this year on \$550,000 worth of improvements owned by the Canadian National Railways.

Coal Bonus Continued

Ottawa, Ont.—Federal assistance in the movement of Canadian coal will be continued at least until the end of the fiscal year of 1933-34. Hon. W. A. Gordon, Minister of Mines, told the House. The estimate this year is \$250,000 greater than last year, because of the extra movements of coal under the subventions agreement.

Eminent Lawyer Dead

John S. Ewart, K.C., Started Practice Of Profession In Winnipeg

Ottawa, Ont.—Death has closed the long career of John S. Ewart, K.C., one of Canada's most eminent constitutional authorities, distinguished lawyer and author. He was 85 years old and had been ill since new year's when he suffered a heart attack.

Mr. Ewart was widely known for his championship of the cause of Canadian autonomy. He held this view this country should be an independent nation long before the present Dominion status within the empire was defined.

Born and educated in Toronto, Mr. Ewart went west after he was called to the bar and after practicing his profession with success in Winnipeg, came to Ottawa to carry on an extensive supreme court practice.

He was the author of several authoritative legal text books and of many essays, articles and pamphlets on constitutional, political and historical subjects.

Returning Arms To Italy

Austrian Government Sending Back Rifles and Machine Guns

Vienna.—The Austrian government will speed the return to Italy of 50,000 rifles and 200 machine-guns over which an international situation occurred, Chancellor Engelbert Dollfuss has announced.

He said, however, the government will not comply with the "drastic conditions" of an Anglo-Franco note demanding the return or the destruction of arms recently shipped into Austria from Italy.

The chancellor said he did not plan to make any formal reply to the note, which suggested the transportation of the arms violated the St. German treaty.

He contended there had been no violation of the treaty.

Nevertheless, he continued, the Austrian government will speed up as far as possible the completion of the "repair" of the weapons shipped from Italy. Italy is now willing to have the arms sent back as soon as possible.

Inquiry Into Spread Between Milk Prices

Premier Bennett Gives Notice Of Move In House

Ottawa, Ont.—Premier R. B. Bennett has given notice he will move in the House of Commons to empower the agricultural committee to inquire into the spread between milk prices in Canada. He would instruct the committee "to ascertain the facts connected with the production, collection, manufacture, distribution and marketing of milk and milk products throughout the Dominion of Canada, with power to examine and inquire into all aspects of the question and report their findings to the House."

A NEW WORLD'S RECORD

The "Bluebird II," which covered the course at Daytona Beach in a new world's record, Sir Malcolm Campbell, British Speedster, set up a new mark of 272 miles per hour. Extensive alterations were made to the "Bluebird" to greatly increase its power.

NOW LOOKING FOR RECIPROCAL TRADE WITH U. S.

Ottawa, Ont.—Early initiation of negotiations with the United States looking to a reciprocal trade agreement are favored by the Liberal party. At a caucus of Liberal members of the senate and House of Commons the reciprocity resolution brought before the House of Commons by William Duff (Lib., Antigonish-Guysboro) was endorsed.

The action of the Liberal parliamentarians followed a debate in the House of Commons, in which Premier R. B. Bennett stated the government was ready to enter into a reciprocal trade agreement, but expressed his belief the present was not an opportune time to launch negotiations.

The only definite immediate result of the Liberal caucus decision as seen in parliamentary circles is that Mr. Duff's resolution will not be withdrawn, as Mr. Bennett suggested. It will be made the subject of further debate and, if time permits before private members' periods are cut off, will be forced to a vote.

New York.—A special Washington despatch printed in the New York Times says Henry Morgenthau, 2nd, close counsel of President-Elect Franklin Roosevelt, made a recent visit to Ottawa and it links the visit with present talk in Ottawa of trade reciprocity between the Dominion and the United States.

The despatch declares the American president-elect sent Mr. Morgenthau, son of the former American ambassador to Turkey, to Ottawa for the express purpose of ascertaining prospects for working out a reciprocal tariff understanding. It does not state, however, which Ottawa officials, if any, were interviewed by the emissary.

Mystery Over Prisoner Disturbs British House

Members Seek Facts About Officer Confined In Tower

London, Eng.—The House of Commons took on a mediaeval flavor as the members badgered the government over the mystery of the officer in the Tower of London.

Laborites and Conservatives alike showered questions as to the circumstances surrounding the imprisonment of Lieut. N. Baile-Stewart, of the Seaforth Highlanders, who will probably face a court-martial early this month, on unspecified charges pertaining to the violation of the Official Secrets Act.

G. Bonanum, Cyclesdale left-winger, demanded to know why bail was not allowed the prisoner, while Winston Churchill joined in the general interrogation by questioning why it was not possible to detain an officer under arrest in Aldershot.

Duff Cooper, financial secretary to the war office, stated the charge against the officer was that of offence under the Official Secrets Act and he would probably face a general court-martial early in March.

"He is detained in the tower," continued the government spokesman, "because it is the most convenient military establishment for that purpose."

"He is under no compulsion to take exercise at a time when he can be seen by the general public," replied Mr. Cooper.

Asks For Correspondence

Ottawa, Ont.—George Coote, United Farmer member for Macleod, seeks all correspondence passed between the province of Alberta and the Dominion Government relating to the failure of the City of Calgary to pay New York premiums on a bond issue at the new year.

May Resume Work On Liner

London, Eng.—The government was understood to have opened discussion with the directorates of the White Star and Cunard shipping lines looking toward resumption of work on the uncompleted giant Cunarder lying half-built in a Glasgow shipwright's yard.

Get Your Green Trousers.
A dispatch from Bradford, England, the center of the wool fabrication industry, says that men will be wearing green trousers this coming summer. Anyway, the man facturers have made up the cloth, and they say it looks well, and that, unless the men balk, there will be thousands of them that before fall will be clothed like the lillies of field.
The new cloths are being sent first to the Cambridge University, where, if the college boys "fall" for them they will spread to the rest of the world—maybe.

The Long-range View.
Mr A L Searle, president of Searle Grain Co., said recently: "During my fifty years of experience in grain handling and marketing I have seen the price of wheat at Chicago and Winnipeg rise at least ten times, at almost equal periods of time, over the dollar mark; and I have seen it similarly fall some ten times below the dollar mark."
Usually each time people thought it would never recross the dollar line—but it always did. It is significant that many of those who three or four years ago were saying "We'll make those fellows over in Europe pay us what our wheat is worth" are now desparingly asking whether wheat will ever again be worth growing.
The long-range view and the level head are needed in times like these.

The Useless "Good Citizen."
There is a certain type of man in every community who poses as a good citizen. He breaks no laws; lives morally; pays his honest debts; and is never tangled up with the law in any manner. But he lives of himself, by himself, and for himself exclusively.
When the call is issued for volunteers to put across a community movement and give a boost, he never answers.
When calamity has befallen people in certain localities and charity flies to their rescue, he is never one of their number.
When money is needed for a public enterprise his name is never on the list.
When he sees a neighbor stuck in the mud, he detours to avoid him.
In fact, if he stood on the shore and saw the ship of state sinking, he would never offer to throw out a line. And if all mankind was fashioned from this same kind of chap what would happen?
There would be no churches no hospitals for the sick, no institutions for the unfortunate, no progress.
If you are about to become a useless "good citizen" read this editorial again.

The Evergreen Cigars.
For weeks I have been smoking my Christmas-gift cigars, and I've been gasping, choking, my throat has many roars:
Existence has been hectic amid their rancid smells, and I am apoplectic with frequent dizzy spells.
The cabbage they are made of was good without a doubt, and naught to be afraid of, if in the form of kraut;
Had it been sliced up neatly and served to me as stew, I'd have consumed it sweetly, and not used language raw.
I hold there's nothing finer than luscious cabbageheads brought freshly to the diner from dewy garden beds;
They're good for grey old fogies when cooked with good corn'd beef, but when they come as elegies, they cause all sorts of grief.
And I have coughed and strangled o'er Christmas-time cheroots until my nerves are jangled and sweat is in my boots;
Unfit for human critters, with greasish, palid hues, they taste like burdock bitters, they smell like burning shoes.
They smell like old-time flivvers, consuming eight-cent gas; but oh! the kindly givers keep tab on me, alas!
They watch with glances unpleasant, keep tab from day to day, for fear I'll scrap their presents or give their smokes away.
Sometimes they catch me buying the good cigars I like, and then I hear them crying to Pete and Heck and Mike.
I hate to hurt their feelings, to give them jolts and jars, and so, with dismal apologies, I smoke those punk cigars.
I smoke them in the twilight, and when the night is sped: the fumes go thru the skylight, and lots of birds fall dead.

For Sale—Tamarac fence posts.
7 ft. long: 3c to 7c apiece. Martin Goebel, Spruce Grove. 48

Wanted, Reliable Housekeeper:
small wages; light work. Write, stating wages, Michel Bros., Holborn.

Wanted, Legs of Pork. Royal Cafe.

CHILD PROTECTION.

For \$1.00 per year the General Accident Assurance Company of Canada will insure a school child for any out of pocket expenses in connection with an accident whether it be Hospital, Nurse, X-Ray, Dentist or Doctor's Bills we will pay them up to \$100.00.

Here is the application—

New Lubrication Plan.
Latest development in service work is the selling of a lubrication program along with the car. General Motors Products of Canada makes history by introducing this idea thru its dealers. Method of operation—when a new General Motors car is delivered a lubrication coupon book is delivered with it. The coupon book is not transferable and contains 10 coupons, each of which, when signed by the owner, is good for one lubrication at any authorised General Motors dealership in Canada. Coupons with 1933 cars are good until Dec. 31, 1934. For further particulars see Sommerfield & Mayer, agents for General Motors cars and trucks.

For Sale—Tamarac fence posts.

Keep ROYAL YEAST CAKES handy in your kitchen

SWEET ROLLS made with Royal Yeast Cakes (overnight dough method)

In the evening dissolve 1 Royal Yeast Cake in 1 1/2 c. of tepid water. Scald and cool 2 c. milk, add 2 tbs. butter and 2 tbs. lard, 2 tbs. sugar and 1 tsp. salt. Eat in the yeast and 3 c. flour. This makes a Sponge Dough. Let rise overnight.

In the morning cream together 4 egg yolks, 4 tbs. sugar, 1 tsp. cinnamon (optional), and beat into the sponge. Add 5 c. flour to make a smooth dough. Knead thoroughly. Let rise till double in bulk. Form into Parker House Rolls or any other shape. Let rise till light. Bake about 25 min. in moderate oven, 375° F.

CHAPTER VI.—Continued.

"To buy it? You making a trip? Go ahead, take it and use it, Alan." "But I'm not bringing it back. I'm leaving this country in it. How much?"

Drummond was all tangled in Alan's swift words. "That canoe isn't worth a lot . . . You're leaving this country . . . The motor cost me a hundred but it's three years old . . . You're not bringing it back? . . . I guess fifty dollars, Alan. But what is the name of it?"

Alan gave him the fifty and strode out the door. Down the terrace at the steamer landing, Joyce was waiting for him, as he had asked her. Laying his pack in Drummond's canoe and untying the painter, Alan stood holding it, hat in hand, for a few last words with Joyce.

He said slowly, lengthening these last moments with her: "Joyce, I'm going away. I'm going after those six men. Bill will tell you something about it. I arranged with the children's nolle . . . when everything is a burden . . . when you are irritable and blue . . . try this medicine. 98 out of 100 women report benefit."

It will give you just the extra energy you need. Life seems worth living again.

QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge . . . when you can't stand the children's nolle . . . when everything is a burden . . . when you are irritable and blue . . . try this medicine. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life seems worth living again.

W. N. U. 1933

with wonder. Alan was tempted to tell her all. He could depend on her not to breathe one word of it. A score of times he had confided police secrets to her and she had given him invaluable information gleaned from Indians and breeds.

But his plan was a desperate gamble, and Joyce would surely recognize it as such. She might lose faith in so obvious a venture. And he thought: "I'll be entirely out of the country, out of it for weeks and weeks. She couldn't know that; she'd feel too terribly alone; she might even come to believe I've deserted her, as I did last winter. But if she thinks I'm still here on the Waterways, perhaps working secretly, I'll help her keep up hope."

"Joyce," he instructed her, "I'd like for you, there at the trading post, to question these Indians and metis when they bring in poultry. You might pick up some information about those six men."

"Do I tell it, Alan. And if there's anything else to help you—" "There isn't except to keep your courage up and be careful of yourself. Joyce, if you'll promise to take care of yourself there on the Alooska, I'll go away feeling a mighty lot happier. I'll be worrying about you."

"I'll get along, Alan," she said simply.

As she gave him her hand, wishing him good fortune on his venture, Alan had a vision of the lonely, fear-torn weeks ahead of Joyce. He was all sympathy and tenderness for her—so brave a girl, so loyal to her dad, so spirited and pretty.

He was shaken with the temptation to tell Joyce of the secret and powerful circumstances which had torn him away from her and made inevitable his engagement to Elizabeth. He had done Joyce a wrong; he owed her a confession and an explanation of his motive. But there were reasons that kept him silent. He had fought that fight in his own conscience; he had acted deliberately. To tell Joyce of it now would avail nothing. He felt that Joyce, however much she had loved him once, had gone back to a casual friendship with him now, and a resurrection of their intimacy would be painful to them both.

With a handclasp, a final word of cheer about her father, he stepped into the motor canoe, started the engine, headed the boat out from the shore. Looking back, he watched Joyce's slender figure grown more and more wraith-like in the mist until his eyes no longer could see her.

Over at the MacMillan trading post

Joyce was awaiting a visit from Bill Hardrock. A young Loucheux, John Tabanaak, had brought a note from Bill, saying he would be along some time late this evening.

This last week had been a feverishly busy one for her. With no hesitation she was sacrificing the entire trading stock. Word of her good bargains had gone out by moccasin telegraph, and the peltry was rolling in beyond all her expectations. Her days were from twenty to twenty-four hours long. Hearty meals for herself and old Dad Pence. Sleep in broken bits when she could snatch an hour or so. Sorting and grading furs as expertly as any man. It was work for any two men, and she was doing it lone-handed, earning the four-dollars to fight her dad's battle.

Faithfully carrying out Alan's instructions, she had done a bit of detective work on her own account. But she failed to glean the slightest hint of information.

The mystery of the bandits' sudden appearance engrossed her, as it had Alan; and with good reason it made her keenly uneasy. Those men were hiding in the Thal-Azzah, not many hours distant. Knowing in her heart that her father was innocent, she believed that they had put that fateful pack of furs in the shed because of some animus against him. Their hostility might extend to her, his daughter; and they might make some attempt against her. There were times, when she thought of those vicious brutal criminals so near her, that she wanted to flee back to the safety of the post and the mothering of Mrs. Drummond.

Before she left Endurance, Bill had told her that Alan had bought out and had severed relations with the Force for good and all. That was the news which Joyce had been brooding about. Elizabeth had wanted him to get out of service. He was out now. Elizabeth had wanted him to take that Victoria job. He probably would take it now. Elizabeth had had her way with him. The thing which had held her and Alan apart no longer existed.

For more than a year Joyce had seen Alan Baker slipping away from her, little by little. She had fought for her secret hopes as one will fight in the face of death. She had seen Alan's her days were like a passionate cry for him. He was the meaning and purpose of life to her, and she could no longer bear up under her racking doubt. She, too, had come to the parting of the ways, and must take some irrevocable step.

In the twilight she heard the drone of Bill's motor canoe across the Alooska. When the craft swung around a bend, she stood up and waved. Catching sight of her on the jutting rock, Bill gazed in astonishment.

He held a warning still in her heart. He had a man's stubborn will power, he was honest and open as daylight, he was loyal clean through. Joyce knew that Bill loved her, in a dogged hopeless way, asking nothing more than to do favors for her and be always dependent upon her. She needed some one. She was sorry for him, terribly sorry he loved her. For his sake she had several times rebuffed him; but it hurt Bill so visibly that she had stooped.

She invited him: "Bill, let's go up to the post. You're fired. And I'll get you a bite to eat."

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver

—No Calomel necessary

Many people who feel sour, sluggish and out of sorts, are suffering from a diseased liver. This is the only way to get the bowels and organs into line. What is your liver doing for you? Start your liver pouring the daily two glasses of liquid into your bowels. Get your stomach and intestines working as they should. Carter's Little Liver Pills will soon see you up and running. Ask for them by name. Refuse substitutes. See at all drug stores.

Throw OFF That COLD!

Some men and women fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold get no further. If a cold has caught you unawares, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold that hangs on for days. To say nothing of the pain and discomfort Aspirin might have spared you! All druggists; with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

ASPIRIN

TRADE-MARK REG. IN CANADA

"I can't Joyce," he reluctantly refused. "I've got to light out for Endurance. I just wanted to drop past and see that everything is all right with you. How've you been making out?"

"Better than I even expected. I've taken in an awful lot of furs."

"That's good. But I mean, any trouble with these 'breeds or Smokies'?" He spoke rather beligerently toward a hypothetical enemy of hers. "Not the slightest bit," Joyce assured him. That was not exactly true; a couple of incidents of the last week had been a little ugly. But she felt she could guard herself against those cowardly men.

She asked rather hesitantly, "Has anything happened at Port Endurance, Bill?" She was thinking of Elizabeth waiting there, and that beating question crowded out even her father's trouble. It took an effort to speak of it. Bill knew more of Alan's plans than she did. He might know the answer to that question.

He said: "No, nothing much has happened. I moved up to Alan's cabin. Haskell has made Whipple a corporal. Imagine that! The new doctor for Hornell Island came past on his way down north, and looked at Larry. He couldn't do any more than Father Claverty has done. Larry's getting some strength back, and that chest wound is past the danger point; but his leg is all busted. The doctor said Larry 'ud be permanently crippled. No hope of anything better."

"Have they sent — Is Dad still there?"

"Yes. We can't spare a man to take him out. He'll be there a week or ten days yet."

"You'll tell him about my good luck here, Bill? And tell him I'll be with him as soon as I close out this post?"

Bill nodded. Personally he hoped that this news might lift Dave MacMillan out of his despondency. Dave's state of mind was causing Bill anxiety. Resenting any kindness, he had sunk into sullen mood, uncaring, hopeless—a man brooding self-destruction.

Joyce forced herself to ask, "Have you heard anything at all of Alan, Bill?"

"No, not a word. I don't expect to for some time."

"You must know where he is and what he's doing . . ."

Bill realized she was asking him to tell her of Alan's venture. He wanted to tell her; and he knew he could trust her, but Alan had asked him not to let her know where he'd gone, and Alan might have personal reasons for it.

He lied: "No, I don't know. I'd just be guessing."

"But he's coming back, sometime, to Endurance?" Joyce persisted. "He may come back and may not.

But not to stay. He's out of service, broke away complete. He turned his cabin and things over to me. He isn't intending to come back. I know definite. He's going to take that job in Victoria. Told me. One of the last things he said."

There was a moment's silence. Bill looked at Joyce curiously. She was staring down at the rock, plucking with trembling fingers at the wolf-foot moss, she was pale. "Dad Alan says—" the words came slowly, like reluctant footsteps—"any thing about when he'll get married?"

"He didn't exactly say when, but it'll be as soon as he's carried through this scheme of his."

Messrs Eddie Mayer, H Pailer, Hy Schultz, Bill Kulak, Arthur Hassy, W Ulmer, Ph Schultz, L Lory, Alf and Art Lutz.

News of Rosenthal.

Mr and Mrs Joe Dietrich entertained a host of their friends on Tuesday evening last; the evening was pleasantly spent in dancing and games. At midnight a dainty lunch was served, which the guests greatly enjoyed. Those present were—

Mr and Mrs Wm Kulak, Mr and Mrs Geo Kulak, Mr and Mrs J J Kulak, Mr and Mrs Henry Kulak, Mr and Mrs John Shultz, The Misses Della and Lily Kulak, Ella Kulak and Betty Kulak.

Messrs Ed and Jac Kulak, Wm Miller, Hy Shultz, Val Kotscherofski.

On Sunday Feb 26, to the wife of Jac Hoffman, a son.

Wedding bells will soon be ringing out at the Lake district.

The smoke of election has cleared away. Now the boys

Here's Bad News.

A dispatch from Toronto says: "A graded reduction in salaries, effective June 1, is to be made by the Canadian Bank of Commerce; the revision averaging 7½ to 8 p.c. over the whole salary list of the bank."

'The Bishop's Candlesticks.'

The Ladies Aid of United Church are putting on an entertainment in Moose Hall on Friday Evg, March 10th, at 8.30 o'clock.

The Dramatic Club of McDougall Church, Edmonton, will put on a 45-minute sketch "The Bishop's Candlesticks," a humorous number of music and readings to complete the bill.

Adults 25c, children 15c. Everyone invited to come, for an entertaining evening.

will be called on to face the music!

Louie Altheim is operating a "shearing" shop at Duffield.

Liberal Association Meeting.

On Saturday afternoon next at Moose Hall, Mr W R Howson, the Liberal leader in the Provincial Assembly, will give an address on the present situation of affairs in this Province, and the problems which confront the Brownlee Government. Several other members of the Liberal party will also give addresses.

The meeting is to be under the auspices of Stony Plain Liberal Ass'n, and it is expected there will be a reorganization of the association and an election for officers.

Walther League Conference.

The 8th annual winter conference of Alberta and British Columbia District of the Walther League was held in Stony Plain from Feb. 24th to the 26th.

The closing session of the Conference was held Sunday afternoon in St. Matthew's Schoolhouse No. 2, at which there was a good attendance. There were the usual devotional exercises.

Addresses were then given on various subjects. Among those who spoke at this session were: Revs J Kuring, A Appel, E Eberhardt, V Meyer, G Raedke, [Zschoeche, Ohlinger, H Kuring, Professor Baepfer, Messrs J J Zubick, P Enders.

With the Curlers.

The following prizes were competed for at the local rink, last week, where the mixed bonspiel was in progress—

Grand Challenge—
1st—2 footstools, 2 glass salad bowls.

2d—4 sacks Robin Hood flour, donated by Mr Connolly.

The first prizes went to the rink skipped by R E Wood, and consisting of Mrs L Wudel, Miss Mabel Clark, H Campbell.

The second prizes went to McCulla's rink, comprising Mrs R Breitkreutz, W Lewis and Sam Zucht.

Holborn Happenings.

A meeting is billed to be held at Holborn hall Saturday Evg, March 4, under the auspices of the United Farmers of Alberta, Holborn Local.

Those billed to speak are—Donald MacLeod, M L A., Dr Alexander, of the University of Alberta,

Mr Elmer Roper, editor of Alberta Labor News.

This meeting should be attended by all who wish to learn more about the problems of today.

Muir Lake Community.

The last of the pre-Lenten Community affairs at the Muir Lake Community Hall was held on Friday evening last, it being a regular monthly dance. A large crowd of members and their friends participated, and danced to the wee, sma' hours, to the excellent music provided by the Snappy String Quartet. Watch for the announcement of the next entertainment at Muir Lake Hall.

Card of Thanks.

Thru the medium of The Sun, Mr John Staub thanks the voters in Division Six for their kindly action in electing him as their councillor for Inga M.D.

Stony Plain and District.

Mr and Mrs John Schultz and family left this week for their new home in Barrhead district.

Mr W Saxby, the popular banker, left this week for his old home town—Olds.

The winners at the whist drive held Monday Evg at the home of Mr and Mrs W Kelly were: Ladies' 1st, Mrs L M Larson; 2d, Miss Eversman; gents' 1st, R Beuerlein; 2d, Mike Adamski.

Mr John Reiser made a business trip to the City yesterday.

The inaugural meeting of the Councillors of Inga Municipality takes place in Stony Plain Monday March 13.

At the recent election at Stony Plain United church for two lifetime elders, Mr James Malloch and Dr Oatway were selected.

The main attraction at the skating rink tonight (Thurs.) is the Moccasin dance, with orchestral music.

A meeting was held here this week under the auspices of Alberta Wheat Pool, when addresses were given by the Messrs Geo Bennett and J P Watson. Wheat Pool matters and the general marketing situation were dealt with.

The starting time at the local Public school is now 9 in the morning.

The Ladies Aid of United church met Wednesday Mar. 1st, at the home of Mrs R A Walton.

It is reported that the marriage will take place today (Thursday), in Edmonton, of Miss Florence Kulak (daughter of Mr and Mrs Valentine Kulak Jr.) and Mr Frederic Goetz of Stony Plain. They will reside in Heatherdown district.

The muskrat season opened pesterday, March 1, for the area north of the North Saskatchewan river and south of Tp. 91. The season closes on April 14.

BUTTER AND EGGS WANTED at The Royal Cafe.

Central Athletic Club.

A group of 30 young fellows met on Wednesday, Feb. 22d, for the purpose of organizing a club to conduct sports in the Inga and surrounding districts. Wm Litzenberger was chosen President and Wm Mills elected Secretary. Mr B G Powell has generously donated the use of the old Warden schoolhouse for the use of the club.

It was decided that meetings are to be held every Wednesday night at the old schoolhouse.

Boxing, wrestling and gymnastic stunts are indulged in by the members. Visitors are cordially welcomed.

A dance and pie social will be put on in Warden school Friday next, March 3, for the purpose of raising funds to carry on the sports. Ladies bring pie; gents pay 35c.
